### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Heather Ramirez on 4/13/2006.

The application has been amended as follows:

**In the claims:**

Claims 18-20 have been cancelled.

The following is an examiner's statement of reasons for allowance:

The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed method of steering a catheter wherein the catheter comprises first and second sealed steering lumens having each spaced at a different longitudinal distances from the end of the catheter, and each having termination points located at different radial locations around the circumference of the catheter, wherein the catheter is steered using fluid-force-induced bending moments by creating first and second moments using a first and second flow rate to achieve a first and second pressure each lumen.

The closest prior art of record Burns et al. (3,773,034), however this reference does not disclose multiple fluid controlled lumens that having different termination points along the catheter body in conjunction with fluid steering.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
